

# STOP ARMING ISRAEL

UK arms companies are complicit in the genocide of Palestinian people

Our government and our arms industry **are complicit** in Israel's horrific war crimes. Our politicians have repeatedly **failed to act**. So it is left to ordinary people across the country to **take action** against the **genocide profiteers** on our doorsteps - to say **we will not stand by** while companies in our communities **make money** from the death of Palestinian children.

Since 2015, the UK government has licensed **£487m worth of weapons and military equipment** to Israel in single issue licences. But this figure is just **scratching the surface** - as it doesn't include open licences whereby **unlimited quantities** of specified military equipment can be exported **without further reporting requirements**.

One such open licence is for components for the **F35 combat aircraft** that are currently bombarding Gaza. UK industry makes **15% of each F35**, and we estimate the value of the F35 contract is **at least £336m** since 2016.

The situation in Gaza is **beyond catastrophic**. Israel is committing **war crimes** amounting to a **genocide** against the Palestinian people. Israel has **killed** tens of thousands of Palestinians, including thousands of children, **deliberately targeted** hospitals and refugee camps, and **refused** to allow aid into the region.

Follow the **QR code**, find your local arms dealer, and say **NO** to companies profiting from genocide on **YOUR** doorstep!
